

INTERTANKO releases standardised Gas Form C for LPG and LNG

18 December 2019 – (London)

INTERTANKO has released updated Gas Form C forms for LPG and LNG with the intent on standardising both the forms themselves and the information provided on them. At present, a large number of Gas Form Cs are company-specific, often referring to commercially sensitive information such as speed and consumptions, which can alter throughout the stages of a vessel's life. These new forms will assist INTERTANKO Members, as well as the industry at large, with improving the quality of the documents that are publically available.

"The role of the Gas Form C was identified as an Owners' document that is predominantly used during the negotiation of a deal. Through INTERTANKO's Gas Tanker Committee working group, it was noted that a lack of standardisation was working against the positive changes being made in the wider market to provide consistency and clarity", explains INTERTANKO's Commercial and Markets Manager Claire Georgeson.

"We focused on removing all commercially sensitive information from these forms and, working with industry partners, aligned them into one easily recognisable form. The key is education and helping Owners to identify what information is standard and what is negotiable."

The forms will be co-hosted on the Q88 platform. Fritz Heidenreich, President of Q88 LLC, said: *"Standardising these forms for the LPG/LNG sectors improves the efficiency of how the industry handles such information. We are pleased to assist INTERTANKO in this project."*

The two forms are available to download from both the INTERTANKO and Q88 websites:

Notes to editors:

1. INTERTANKO is the International Association of Independent Tanker Owners, a forum where the industry meets, policies are discussed and best practices developed. INTERTANKO has been the voice of independent tanker owners since 1970, ensuring that the liquid energy that keeps the world turning is shipped safely, responsibly and competitively
2. Q88 LLC is the platform used by shipping professionals to conduct business. Founded in 2001, Q88 LLC is the leading SaaS technology provider to the maritime industry. Q88's mission is to make the global shipping industry more open and connected. People use Q88 products to share information and work collaboratively, to access disparate information, and to turn static data into powerful insights.
