

The platform used by shipping professionals to conduct business

Q88 by the numbers

1,280+ questionnaires

9,000+ charter party clauses

Over 400 years of combined industry experience

Key Features

- Full access to all certificates in the system
- Create questionnaires, including terminal questionnaires on the fly directly onboard
- Directly manage the officer matrix
- Direct update of vessel data from the bridge
- Update inspections in the system as they happen.
- Lookup comprehensive commodity data for safe handling of Annex 1 cargoes
- Review cleaning procedures between current and next cargo
- Full audit trail
- Vessels access secured with two-factor authentication
- Each vessel can only see their own data

Key Benefits

- Minimize risk through access to the most up-to-date and accurate single source of vessel data
- Benchmark fleet performance against best practices and industry averages
- Increase efficiency through streamlining outdated processes

Q88 Onboard allows shipowners to grant access for any or all vessels in their fleet to the full functionality of Q88 but limited to each vessel's own data. In addition, the vessels can look up all Annex 1 (CPP and crude) commodity data and from/to cleaning information. Q88Onboard is a cloud only solution available to shipowners from July 2021.
