

# The platform used by shipping professionals to conduct business

## Q88 by the numbers

Improved responsiveness

Operational efficiency

Greater visibility and control

Optimal fleet utilisation

### Key Features

- Full access to all certificates in the system
- Create questionnaires, including terminal questionnaires on the fly directly onboard
- Directly manage the officer matrix
- Direct update of vessel data from the bridge
- Update inspections in the system as they happen.
- Full audit trail
- Vessels access secured with two-factor authentication
- Each vessel can only see their own data

### Key Benefits

- Minimize risk through access to the most up-to-date and accurate single source of vessel data
- Benchmark fleet performance against best practices and industry averages
- Increase efficiency through streamlining outdated processes

**Q88DRY Onboard allows shipowners to grant access for any or all vessels in their fleet to the full functionality of Q88 but limited to each vessel's own data. Q88DRY Onboard is a cloud only solution available to shipowners from July 2021.**
