

COMPETITIVE EDGE FOR THE SHIOWNERS

A breakthrough in maritime intelligence

Seamless
Integration

Accuracy

Easy to Use

Single Access
Point

Key Benefits

- Seamless Integration with existing systems and software
- Compare your fleet and operations to the competition and the market at large
- Capitalize on predictive modeling to anticipate conditions and better plan voyages.
- Multiple AIS sources improve the accuracy of position data
- Customize it for your unique needs via customizable analytics, predictive and reporting.
- User friendly search, clearer data visualizations and simple export functionality with flexible formats
- Follow-the-sun support model employed for unmatched customer service

Key Features

- **Predictive Search:** Allows you to see how your ships stack up in the market against potential competition.
- **Data Visualization:** Powerful map and list tool looks at current and historical vessel tracking, calculates ETA and more.
- **Analytics:** Construct tonnage supply lists and intake analyses including historic data, and track tonnage supply trends over time by based on geography and vessel.
- **Formats and Reporting:** Easily configure custom export formats based on your demands, without any third party support needed.
- **Emission Calculator:** Estimate CO2 and EEOI on a ship by ship basis, based on open positions, estimated consumption, distance traveled and other criteria.
- **Cargo and Fixtures:** Track market fixtures with our Cargo and Fixtures feature

Q88 Pro users are connected to Q88.com, the gold standard in the tanker information management, giving you access to intelligence covering 80% of the tanker industry
